summary

comparison operators

equality operators

ordering operators

equality operators

```
true == true   →   true
true != true   →   false
```

ordering operators

```
1 < 2   →   true

2 > 5   →   false

2 >= 2  →   true

3 <= 2  →   false
```

assignability and comparison

```
i, f := 15, 5.0
```

```
i > f
```

```
i > int(f)
```

a logical operator

combines

bool expressions

and yields

a bool value

logical operators

Logical AND Operator

```
true && true      → true
```

Logical OR Operator

```
false || false    → false
```

Logical NOT Operator

```
!false            → true
!!false           → false
```

short-circuit

```
false && true
```

runs

skips

```
true || false
```

runs

skips
